Dear Councillor,

**Re: Planning application submission for Thornborough Grounds Solar Farm**

Following the screening submission to Aylesbury Vale District Council in November 2014 and the parish exhibition on 27/11/2014 Lark Energy intend to submit a Full Planning Application to Aylesbury Vale District Council by the end of February.

Having taken on board the comments from the Public Consultation, the consultation feedback forms and having subsequently commissioned and considered the Landscape and Visual Impact Assessment report, from LDA Design, the application site will not now include the field that abuts the Bridleway to its south. This is to protect the visual amenity for those using the bridal way. For reference please refer to the plan that depicts the site edged with a red line.

Yours sincerely,  
Humphrey Jamieson.
